

ENERGY WORKS

The **Energy Works** programme, based around renewable energy and climate change, is available free of charge to CEES subscribers throughout Cambridgeshire and beyond, thanks to the generous support of CEES' partners, The Co-operative Group, Fenland District Council, and Scottish Power Renewables.

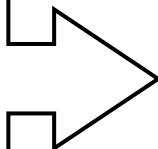

ENERGY WORKS offers a comprehensive two-day package which can be tailored to the needs of each school. Programmes may include:

- a site visit to the Co-operative's Wind Farm at Coldham and its education centre
- design and technology projects using model wind turbines and structures
- a site visit to Sutton Bridge Power Station (in partnership with EDF Energy) and/or
- hands-on interactive workshop sessions with mini solar, photovoltaic and wind power kits in school

The whole package is delivered by one of CEES' qualified, experienced teachers, using programmes that have been developed for key stages 2, 3, 4 and A level.

**Bookings are now
being taken for 2011.
