

DEVELOPING THE ROLE OF THE SCIENCE LEADER

Are you leading and supporting learning in Science in your school?

Sometimes it is hard to know where to start improving the science teaching and learning across the whole school. This training afternoon will help you explore ways the Science leader can develop and raise the profile of science in your school.

We will begin by looking at what “Good science looks like in the primary school setting.”

Then provide some support and ideas on how to monitor and assess Science in your school and collect evidence to help you write an action plan for Science.

Finally we will look at some new resources that will help you support your staff to deliver effective and exciting Science in their classrooms.

Nina Spilsbury has over 40 years’ experience of teaching, with age groups from Nursery to Secondary, working in both the West and East Midlands. Nina is an Advanced Skills Teacher (AST) and has been awarded Science Teacher of the Year.
