

PUZZLE AND PROBLEMS, NUMBERS AND NATURE

Bringing maths to life in the school grounds

CEES' professional development workshops aim to inspire participants to use their school grounds to bring maths to life. This workshop will be run in collaboration with colleagues from the Schools Intervention Service.

The emphasis of the workshops, which are designed to support the National Curriculum, will be on practical, "hands-on" learning activities suitable for use in any school grounds

Our activities will help to engage children in maths, reinforce classroom work, enhance understanding and offer opportunities to apply mathematical skills in the outdoor environment.

Taking maths into the school grounds should contribute to raising achievement for all, including, those children for whom Pupil Premium funding is available.

The workshop will run from **1.30 to 4.30** on:

Stibbington Centre (PE8 6LP)

Monday 2nd October

Teacher comments from similar workshops:

Lots of lovely ideas to take back and ideas suitable for a range of ages. I plan to build more outdoor learning into my maths.

Great ideas for making maths more practical and relating learning to real life.

I feel inspired to take my class outdoors.
