

# Winter residentials at Stibbington

Tailor made seasonal programmes

**Cambridgeshire Environmental Education Service (CEES)** offers outstanding learning outside the classroom opportunities in the unique, inspirational setting of Stibbington Centre – *whatever the season.*

A variety of carefully selected seasonal activities have been drawn together to create the following curriculum themed programmes.

**Time travellers** – explore aspects of life across the Romans, Vikings, Victorians and WW2

**Geo-explorers** – develop mapping skills, discover the locality and investigate the weather, rivers and water cycle

**Stibbington Scientists** – delve into the natural world to learn about food chains and adaptation through pond dipping and owl pellet dissection. Explore the rocks that are beneath our feet

**Eco-experts** – learn about the world's renewable sources of energy and discover ways to reduce, reuse, recycle and repurpose waste through environmental art activities

**Evening activities** – shorter daylight hours provide plentiful opportunities for exciting evening activities outdoors with a torch lit campfire, reflector trail or star gazing.

*A cosy welcome awaits...*

Our full range of hands-on learning experiences, led by CEES qualified and experienced teachers, are available throughout the year, so you can pick and mix across a number of different learning opportunities.

## Excellent value

**On a winter residential pupils get all the widely recognised benefits of outdoor learning and a residential experience at a lower price. Bursaries are also available for some pupils to ensure access for all.**
